

Job Openings in the Division of Diabetes, Endocrinology and Metabolic Diseases, National Institute of Diabetes and Digestive and Kidney Diseases

The National Institute of Diabetes and Digestive and Kidney Diseases (NIDDK), a component of the National Institutes of Health (NIH) supports biomedical and behavioral research across the country and is looking for strong leaders to support this effort.

Are you an experienced Scientific Researcher or Scientific Administrator in search of an exciting career opportunity? We may be the right place for you. The National Institute of Diabetes and Digestive and Kidney Diseases (NIDDK) at the NIH is seeking talented Medical Officers (MD) to manage clinical studies and Program Directors (MD or PhD) to help move basic research discoveries toward disease prevention and treatment. These positions offer unique and exciting opportunities to provide scientific leadership and to administer grants in support of biomedical research in the US.

Positions are available now and additional openings are anticipated as several staff members in the Division of Diabetes, Endocrinology and Metabolic diseases (DDEM) in the NIDDK are retiring in the near future.

Current Opening

We are looking for applicants with significant research experience, who have a commitment to excellence, and the energy, enthusiasm, and innovative thinking necessary to lead dynamic and diverse programs.

As a Medical Officer in the Division of Diabetes, Endocrinology and Metabolic Diseases (DDEM), you would serve as Director of the Type 2 Diabetes Prevention Program and as a senior scientific advisor to NIDDK for human subject research in type 2 diabetes. You would be responsible for the scientific and administrative management of a portfolio that may include multi-center and single site clinical studies, and for the development of joint research activities with other government organizations.

An appropriate applicant must possess an MD or equivalent degree, and expertise in endocrinology, internal medicine or another specialty relevant to diabetes. Strong candidates should have conducted independent research, and be able to demonstrate the knowledge and insight needed to identify important scientific opportunities in diabetes research and to participate in the design of clinical trials or observational studies. Experience in translational research is also desirable.

The salary range is \$123,758 to \$155,500 per annum, commensurate with qualifications and professional experience, with the potential for an additional Physician's Comparability Allowance of up to \$30,000. A full Civil Service benefits package is available that includes retirement (401K equivalent), health, life and long-term care insurance.

If you are ready for an exciting scientific leadership opportunity, please see the NIDDK Medical Officer vacancy announcement for this position that will be posted April 5-12, 2013 at <http://www.jobs.nih.gov/>. Search for announcement number **NIH-NIDDK-DH-15-855001** in the "Search for NIH Jobs" box.
